

March 1, 2022

Dear Sierra Partner,

Sierra has made the decision to **discontinue the 240i/241i product line effective March 31, 2022**. This letter serves as a formal notification. Any existing InnovaMass 240i/241i orders will be processed. However, we will accept no new orders for 240i or 241i meters **after March 31, 2022**. You should direct any customers needing a vortex meter to use our existing 240S or 241S product.

Our intent is to support the i-Series products for one (1) year through the warranty period. If we cannot support it during this time, Sierra will replace the customer's meter with an S-version vortex mass flow meter.

With this change in our vortex product line, we are releasing a **new price list (V22.2) effective immediately**. This latest revision includes a price reduction on the 240S/241S to make them more price competitive. While the S-Series vortex meters do not have the Smart Interface Portal software, you can make many of the same adjustments through the front display. It comes with more inline options and has better lead times (6-8 weeks). They also have a wider operating range for temperature & pressure. The S-Series units are also much more robust and reliable over time. Again, the new pricing is effective today Tuesday, March 1, 2022. Please click here to access the new pricing via the Rep Portal <https://www.sierrainstruments.com/cms/sales/rep-portal/price-lists/>.

If you have open quotes or receive orders for the i-Series vortex units during the month of March, please reach out to your Regional Sales Manager to discuss the possibility of changing over to a 240S or 241S before submitting the order.

Sierra appreciates and values our business relationship. While we regret any inconvenience this announcement may cause, we are eager to supply your customer's future product requirements with our InnovaMass 240S/241S. Please contact your Regional Manager if you have additional questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read 'SA Row'.
