

NOTICE OF DISCONTINUED PRODUCTS SIERRA MODEL 730, 810C, 830, 840, 207i

Date: January 11, 2023

Dear Sierra Partner,

Sierra has made the decision to discontinue some of our older analog products and one of our ultrasonic models. Except for the 207i, these products have been in the Sierra portfolio for more than 30 years, and many component parts are either at or near end-of-life, and it is increasingly difficult for us to find suppliers. In addition, in the future, these older units cannot be supported by our current calibration standards and practices.

To this end, **the 730, 810C, 830, 840, and 207i products will be discontinued as of March 1, 2023, or upon the run-out of critical parts, whichever comes first.** From now until March 1, 2023, we will be clearing our inventory of these products and are offering a last-buy opportunity. Sierra also has digital-based replacements for all discontinued products, with competitive pricing, better performance, more features and options, and improved support. These details, along with the quantity on-hand at the time of this notice, are in the table on page two of this notice.

If you have any questions regarding the discontinuation of these products, please do not hesitate to contact your representative, your Regional Managers, or the Director of Sales. Sierra has many more innovative new products in the pipeline, including a digital update of our 820 and 820S series product lines, as we continue to improve our products and performance

Sincerely,

A handwritten signature in black ink that reads 'S Rouse'.
