

## Sierra Features Aeration & Biogas Flow Measurement Solutions at WEFTEC

**September 4, 2025 – Monterey, California** – [Sierra Instruments](#) is pleased to announce it will exhibit its gas flow measurement solutions for aeration and biogas at WEFTEC, the Water Environment Federation's Technical Exhibition and Conference, running from September 29 through October 1, 2025, in Chicago, IL.

Monitor and maintain control of aeration, digestion, and cogeneration applications with Sierra's BioTrak series of thermal mass flow meters. In addition to high accuracy and wide turndown, BioTrak offers innovative digital features to adjust to gas composition changes and validate measurement performance for best-in-class flexibility in the field. BioTrak is available in insertion and inline models, with options for AC & DC power input, remote display/electronics, hot-tap/retractor assemblies, and more.

For pipes and ducts with limited straight-run, Sierra's [BioTrak 645i](#) installed with dual-plate FlowTrak flow conditioners ensures accurate and repeatable flow measurement with the shortest straight-pipe requirements of any mass flow meter in the industry.

Visit Sierra at **Booth 7724** to learn how Sierra's flow experts can help meet your measurement requirements. Can't make it to the show? Learn more about BioTrak by clicking here: <https://www.sierrainstruments.com/products/biotrak/645i-745i.html>.

### Sierra. Measurably Different.™

For over 50 years, Sierra has been a global pioneer in the design and manufacturing of precise flow measurement instruments you can trust. We produce accurate and reliable solutions that control industrial processes, regulate emissions for oil and gas operations, convert waste to energy, create silicon chips that enable advanced technology, and deliver life-saving medicine. Representatives in 150 locations in over 50 countries provide innovative flow measurement products and services where and when needed.
